Technologies: HTML, CSS, JavaScript, React.js, tailwind and GSAP

PROJECTS

1. Movie search app
 [moviesearchapp4244.netlify](#)
 - This app allows users to explore and discover movies effortlessly.
 - Users can search for movies by title, director, or writer, filter movies by rating and genre, and manage a personalized watchlist by adding or removing movies.Technologies: - JSX, CSS, React.js, redux, express.js Node.js, Chakra UI.
2. User Management System
 [user-management-system-ht.netlify.app](#)
 - It stores user details like name, phone number, email ID, and company name.
 - It retrieves user information from a database through APIs.
 - Users can perform CRUD operations (Create, Read, Update, Delete) on the stored data.
 - Additionally, it features a search function that allows quick lookup of user data by name.Technologies: - JSX, CSS, React.js, Reacts hook, Redux, Bootstrap
3. Random Quote
 [Random Quote \(htevil.github.io\)](#)
 - It generates a new quote each time the user clicks a button.
 - Users can easily copy the quote along with the author's name to their clipboard for sharing or saving.Technologies: - HTML, CSS, JavaScript, Node.js, Express.js, Fetch Api
